

Size Data, End-of-Season Comments and Flowering Data for Varieties Grown in the Ground

Genus	Cultivar	New*	7/11 H"xW"	8/8 H"xW"	Comments from late September by Coordinator and Research Associate**/ Summarized Flowering Data for Entire Season
Ageratum	Patina Blue		11x9	13x14	Vigorous, many flowers, uniform/ Bloomed strongly through mid-September and then finished the season at moderate amount
Ageratum	Patina Delft		6x7	6x12	Uniform, moderate flowering/ Bloomed strongly from late July through early September and then finished the season at moderate amount
Alcea rosea	Spring Celebrities Lemon		10x10	28x17	75% infested with rust, 75% bloom, lodging/ Only very sparse blooms were present early in the season with peak blooms occurring from early August through early September and then bloomed moderately
Alternanthera	Little Ruby		6x10	13x15	Vigorous plant, uniform, great foliage all season/ Grown for foliage
Angelonia	Alonia Big Blue		10x10	18x12	Few flowers, moderate vigor/ Bloomed strongly from mid July through mid September and then finished the season with sparse blooms
Angelonia	Alonia Blue (was Lavender)		9x10	12x12	Few flowers, moderate vigor/ Bloomed strongly after planting through mid-September and then finished the season with sparse blooms
Angelonia	Alonia Pleasant Pink	New	13x9	21x15	Low vigor, few flowers/ Bloomed strongly from late July through August and then tapered to sparse blooms in September
Angelonia	Alonia White		7x11	7x10	Uniform, moderate flowering, moderate vigor/ Bloomed strongly through early September and then tapered to sparse blooms by the end of the season
Angelonia	Angelface Pink Imp		6x7	12x14	Low vigor, few flowers/ Bloomed strongly from late July through late August and then bloomed sparsely
Angelonia	AngelMist Spreading Pink		14x9	22x14	Low vigor, 90% are dead/ Bloomed strongly from mid July through August and then tapered to sparse blooms
Angelonia	AngelMist Spreading Purple Improved	2011	11x10	11x13	Few flowers, 85% dead/ Bloomed strongly from late July through late August and then tapered to sparse blooms
Angelonia	AngelMist Spreading White		7x10	12x14	All but 2 out of 24 are dead/ Bloomed strongly from mid-July through August and then tapered to no bloom
Angelonia	Archangel Pink	New	4x13	8x14	Low vigor, few flowers/ Bloomed strongly from mid-July through early September and then finished the season with no blooms
Angelonia	Archangel Purple	New	9x9	11x11	Few flowers, healthy looking plants/ Bloomed strongly through early September and then tapered to sparse blooms by the end of the season
Angelonia	Archangel Raspberry	New	10x8	16x17	Low vigor, few flowers/ Bloomed strongly from mid July through mid September and then finished the season with sparse blooms
Angelonia	Archangel White	New	8x10	15x15	Moderate flowering, 25% dying/ Bloomed strongly from mid-July through mid-September and then finished the season at moderate amount
Angelonia	Carita Cascade Deep Purple		8x5	12x12	Few flowers, 40% dead/ Bloomed strongly from late July through August and then tapered to sparse blooms
Angelonia	Carita Cascade White 09		12x8	14x18	Low vigor, no flowers/ Bloomed strongly through mid-September and then finished the season at moderate bloom amount

*New for the 2011 season.

*IMPR for the 2011 season.

**Comments are on first line followed by Flowering Data on second line.

Size Data, End-of-Season Comments and Flowering Data for Varieties Grown in the Ground

Genus	Cultivar	New*	7/11 H"xW"	8/8 H"xW"	Comments from late September by Coordinator and Research Associate**/ Summarized Flowering Data for Entire Season
Angelonia	Carita Purple 09		10x8	16x12	Few flowers, slight signs of disease starting/ Bloomed strongly from late July through August and then tapered to sparse blooms in September
Angelonia	Carita White 09		8x8	12x12	Uniform, moderate flowering, moderate vigor/ Bloomed strongly from mid-July through mid-September and then finished the season at moderate amount
Angelonia	Serena Blue	New	7x10	7x18	Few flowers, 30% showing signs of disease/ Bloomed strongly from late July through late August and then tapered to sparse blooms
Angelonia	Serena Purple		9x6	12x12	Moderate flowering, 4 out of 24 dead/ Bloomed strongly from mid-July through mid-September and then declined suddenly to sparse blooms
Angelonia	Serena White		12x10	20x17	Uniform, moderate flowering, 20% dying/ Bloomed strongly from mid-July through mid-September and then finished the season at moderate amount
Argyranthemum	Flutterby Yellow		17x10	27x18	Still blooming strongly, vigorous, uniform habit, looks better in the Best of Circle which was planted about three weeks later than the trial bed/ Bloomed strongly through mid-September and then finished the season at moderate bloom amount
Argyranthemum	Reflection Pink		16x7	22x13	Lodging, 75% bloom, non-uniform habit and flowering, crowded out by more vigorous varieties/ Bloomed strongly through early September and then finished the season at moderate bloom amount
Argyranthemum	Reflection Yellow Cream		12x7	22x14	Severe lodging, several plants open in center, non-uniform growth, non-uniform color with 25% yellow and the rest predominantly white, 75% bloom/ Bloomed strongly through mid-September and then finished the season at moderate bloom amount
Armeria	Ballerina Lilac	New	9x10	15x12	Moderate flowering, moderate vigor/ Bloomed strongly from mid July through late August and then tapered to sparse blooms
Asystasia	Lilac	New	12x7	14x8	Vigorous plant, no flowers only foliage at the end of the season/ Bloomed strongly from late July through early September then tapered off and finished September with virtually no flowers
Bacopa	Bahia Lavender Blue		5x12	9x13	Non-uniform, some chlorosis, moderate flowering/ Bloomed strongly throughout the entire season
Bacopa	Bahia White		5x12	10x16	Vigorous plant, many flowers, uniform/ Bloomed strongly throughout the entire season
Bacopa	Bahia White Night		8x10	10x14	Few flowers, moderate vigor/ Bloomed strongly from mid-July through early September and then tapered to sparse blooms
Begonia (hiemalis)	New Star Red		8x7	9x9	Many flowers, 30% in decline/ Bloomed strongly throughout the entire season
Begonia (hiemalis)	New Star Rose		10x10	10x11	80% have lodged/ Bloomed strongly through mid-August and then declined to sparse blooms in September with no blooms at the end of the season
Begonia (hiemalis)	New Star Yellow		10x8	10x11	Many flowers, non-uniform/ Bloomed strongly throughout the entire season
Begonia (hiemalis)	Rhine Dragone Pink Hope		10x12	12x14	Vigorous plant, many flowers, uniform/ Bloomed strongly through August and then bloomed moderately for the rest of the season

*New for the 2011 season.

*IMPR for the 2011 season.

Size Data, End-of-Season Comments and Flowering Data for Varieties Grown in the Ground

Genus	Cultivar	New*	7/11 H"xW"	8/8 H"xW"	Comments from late September by Coordinator and Research Associate**/ Summarized Flowering Data for Entire Season
Begonia (hiemalis)	Rhine Dragone Sunset		8x9	10x11	Many flowers, 30% in decline/ Bloomed strongly throughout the entire season
Begonia (hiemalis)	Rhine Nadine		6x8	9x13	75% in decline/ Bloomed strongly from very late July through the end of the season
Begonia (hiemalis)	Rhine Red Baron 2011		6x9	12x10	Moderate flowering, moderate vigor/ Bloomed strongly from mid-July through the end of the season
Begonia (hiemalis)	Solenia Light Yellow		9x11	16x17	Non-uniform, moderate flowering, 30% have sign of disease/ Bloomed strongly from late July through the end of the season
Begonia (hiemalis)	Solenia Red Improved		10x9	12x11	95% dead/ Bloomed strongly until it declined from disease late in season.
Begonia (hiemalis)	Solenia Soft Pink		6x9	13x14	All in severe decline/ Bloomed strongly from late July through early September and then bloomed moderately for the remainder of the season
Begonia semperflorens	Eureka Bronze Leaf Scarlet	IMPR	6x7	7x8	Many flowers, moderate vigor/ Bloomed strongly throughout the entire season
Begonia semperflorens	Fairyland Coral Picotee	New	5x8	8x12	Vigorous, many flowers, uniform/ Bloomed strongly throughout the entire season
Begonia semperflorens	Fairyland Pink	New	5x8	8x13	Vigorous, many flowers, uniform/ Bloomed strongly throughout the entire season
Begonia semperflorens	Fairyland Red	New	6x9	9x13	Many flowers, tiny plants/ Bloomed strongly throughout the entire season
Begonia semperflorens	Fairyland White	New	7x8	8x8	Vigorous, many flowers, uniform/ Bloomed strongly from late July through early August and then declined to sparse blooms in September
Begonia x hybrida	Big Red w/Bronze Leaf Imp.	IMPR	10x12	16x19	Vigorous, moderate flowering, uniform/ Bloomed strongly from late July through the end of the season
Begonia x hybrida	Big Red w/Green Leaf		9x12	15x16	Vigorous, many flowers, uniform/ Bloomed strongly from late July through the end of the season
Begonia x hybrida	Big Rose w/Bronze Leaf		10x11	16x18	Vigorous, many flowers, uniform/ Bloomed strongly from mid-July through the end of the season
Begonia x hybrida	Dragon Wing Red		9x10	14x18	Vigorous, uniform, moderate flowering/ Bloomed strongly throughout the entire season
Begonia x hybrida	Whopper Red Brnz Leaf	New	9x10	14x15	Vigorous, many flowers, uniform/ Bloomed strongly throughout the entire season
Begonia x hybrida	Whopper Red Grn Leaf	New	7x8	9x12	Vigorous, many flowers, uniform/ Bloomed strongly from mid-July through the end of the season
Begonia x hybrida	Whopper Rose Brnz Leaf	New	10x9	15x16	Vigorous, many flowers, uniform/ Bloomed strongly throughout the entire season

*New for the 2011 season.

*IMPR for the 2011 season.

Size Data, End-of-Season Comments and Flowering Data for Varieties Grown in the Ground

Genus	Cultivar	New*	7/11 H"xW"	8/8 H"xW"	Comments from late September by Coordinator and Research Associate**/ Summarized Flowering Data for Entire Season
Begonia x hybrida	Whopper Rose Grn Leaf	New	11x11	16x17	Vigorous, many flowers, uniform/ Bloomed strongly from late July through the end of the season
Bidens	Bidy Gonzales		7x9	13x13	Sparse flowering, low vigor, non-uniform habit, suspected microplasm causing hormonal imbalances w/stunted chlorotic new growth, pathologist diagnosed as Aster yellows/ Bloomed strongly after planting until late July then tapered to sparse blooms by mid-August and finished the season with sparse blooms
Bidens	Bidy Gonzales Big		10x6	11x11	Flowers sparse, low vigor, 50% have very visible dieback, suspected microplasm causing hormonal imbalances w/stunted chlorotic new growth, pathologist diagnosed as Aster yellows/ Bloomed strongly from mid-July through mid-August and then declined suddenly to sparse blooms for the rest of the season
Bidens	Bidy Gonzales Trailing		5x10	8x12	Flowers sparse, low vigor, low-growing, uniform, suspected microplasm causing hormonal imbalances w/stunted chlorotic new plant growth, pathologist diagnosed as Aster yellows/ Bloomed strongly after planting through early August then declined to moderate amount and finished September with only sparse blooms
Bidens	Sunbeam	New	11x12	14x17	Vigorous, still in full bloom, mounding-uniform habit, no evidence of microplasm damage/ Bloomed strongly from mid-July through the end of the season
Bidens	Yellow Charm		7x10	6x13	Non-uniform habit, 25% bloom, suspected microplasm causing hormonal imbalances w/stunted chlorotic new plant growth, pathologist diagnosed as Aster yellows/ Bloomed strongly through early August and then declined to moderate amount
Bidens	Yellow Crown		8x9	12x15	Flowers sparse, vigorous, uniform habit, mounding, suspected microplasm causing hormonal imbalances w/stunted chlorotic new growth, pathologist diagnosed as Aster yellows/ Bloomed strongly from mid-July through mid-August and then tapered rapidly to sparse blooms for the remainder of the season
Brachyscome	Brasco Violet		4x4	7x12	Small plant, overshadowed by more vigorous varieties, delicate small purple flowers/ Bloomed strongly through early September and then finished the season at moderate bloom amount
Bracteantha	Helica Purple Halo	New	9*7	11*12	More vigorous than Helica Snow, flowers fade in sun, almost still in full bloom, 25% dead/ Bloomed intermittently throughout the season, spending most of the season at full bloom amount
Bracteantha	Helica Snow	New	8x8	11x11	25% dead, half of what's left still in bloom, suspected virus or microplasm causing hormonal imbalance on new growth which is stunted & chlorotic, pathologist diagnosed as Aster yellows/ Bloomed strongly from mid-July through early August and then maintained moderate blooms until finishing the season with sparse blooms
Calibrachoa	Fata Morgana	New	6x8	7x9	25% dead, pink dominate, only a handful of white flowers/ Bloomed strongly from mid-July through the end of the season
Calibrachoa	Noa Almond Blossom		6x11	9x16	Larger individual flowers, mounding, chlorosis, full bloom/ Bloomed strongly from mid-July through mid-September and then had moderate flowering
Calibrachoa	Noa Amber Star		4x11	6x13	75% bloom, mounding, non-uniform/ Bloomed strongly from mid-July through mid-September and then had moderate flowering
Calibrachoa	Noa Banana (was Calimor)		6x12	8x18	Some chlorosis, 75% bloom, non-uniform/ Bloomed strongly from mid-July through mid-September and then had moderate flowering

*New for the 2011 season.

*IMPR for the 2011 season.

Size Data, End-of-Season Comments and Flowering Data for Varieties Grown in the Ground

Genus	Cultivar	New*	7/11 H"xW"	8/8 H"xW"	Comments from late September by Coordinator and Research Associate**/ Summarized Flowering Data for Entire Season
Calibrachoa	Noa Blue Legend		5x7	5x11	Spreading, chlorosis, full bloom/ Bloomed strongly from mid-July through the end of the season
Calibrachoa	Noa Dark Pink Carnival		7x8	8x14	75% bloom, chlorosis, non-uniform, low vigor/ Bloomed strongly through mid-September and then finished the season at moderate amount
Calibrachoa	Noa Mega Magenta		4x7	5x8	Spreading, chlorosis, non-uniform/ Bloomed strongly from mid-July through mid-September and then had moderate flowering
Calibrachoa	Noa Mega Pink		5x9	5x14	Three plants dead, full bloom, mounding, chlorosis/ Bloomed strongly throughout the entire season
Calibrachoa	Noa Mega Raspberry		6x6	6x13	Large individual flowers, 25% dead, 75% bloom, some chlorosis/ Bloomed strongly throughout the entire season
Calibrachoa	Noa Red Wine		6x9	7x13	Chlorosis, mounding, uniform, full bloom/ Bloomed strongly from mid-July through mid-September and finished the season at moderate amount
Calibrachoa	Noa Sunrise		5x9	6x17	Full bloom, mounding, no chlorosis/ Bloomed strongly from mid-July through mid-September and then had moderate flowering
Calibrachoa	Noa Sunset		4x7	5x10	Some chlorosis, full bloom, non-uniform/ Bloomed strongly from mid-July through the end of the season
Calibrachoa	Noa Ultra Purple		2x8	3x15	Spreading, chlorosis, full bloom, one plant dead/ Bloomed strongly from mid-July through mid-September and then had moderate flowering
Calibrachoa	Paradise	New	7x14	10x19	25% dead, pink dominate, only a handful of white flowers/ Bloomed strongly throughout the entire season
Calitunia	Calitunia Pink		6x10	15x22	Moderate flowering, moderate vigor/ Bloomed strongly throughout the entire season
Calitunia	Calitunia Purple		3x12	5x15	Vigorous, moderate flowering/ Bloomed strongly from mid-July through the end of the season
Canna	Tropical Bronze Scarlet	New	11x8	15x12	Unique color, moderate flowering, attractive foliage/ Bloomed strongly from mid-July through mid-September and then finished the season at moderate amount
Carnation	Can Can Cocktail Party Mix	New	11x3	12x8	85% flowering, minimal lodging, good color mix/ Bloomed strongly from mid-July through early August and then again from early September through the end of the season with a period of moderate blooming in between
Cleome	Seniorita Rosalita		24x12	34x16	Vigorous, still in full bloom, minimal flea beetle damage, uniform flower distribution/ Bloomed strongly throughout the entire season
Coleus	Colorblaze Alligator Tears		6x10	11x14	Vigorous, uniform/ Grown for foliage
Coleus	Henna	2009	24x21	38x36	Vigorous, non-uniform, earwig damage/ Grown for foliage, did not bloom
Coleus	Lancelot Velvet Mocha		4x10	10x16	Vigorous plant, uniform/ Grown for foliage

*New for the 2011 season.

*IMPR for the 2011 season.

Size Data, End-of-Season Comments and Flowering Data for Varieties Grown in the Ground

Genus	Cultivar	New*	7/11 H"xW"	8/8 H"xW"	Comments from late September by Coordinator and Research Associate**/ Summarized Flowering Data for Entire Season
Coleus	Mosaik Amazon Green		8x13	15x18	Vigorous, barely starting to bloom, very little lodging/ Blooms were present throughout the entire season
Coleus	Mosaik Burgundy Velvet		16x15	30x38	Full bloom, non-uniform, vigorous/ Grown for foliage but produced sparse blooms by mid-September
Coleus	Mosaik Thin Mint		13x13	22x15	50% lodged, 25% starting to bloom, vigorous/ Grown for foliage but produced moderate blooms in mid-September
Coleus	Redhead	2010	18x14	27x22	Vigorous, uniform, 25% have powdery mildew/ Grown for foliage, did not bloom
Coleus	Stained Glassworks Burgundy Wedding Train		6x9	12x14	Growth habit isn't very full but still looks good/ Grown for foliage
Coleus	Stained Glassworks Eruption		11x15	29x27	Low vigor, unique color/ Grown for foliage
Coleus	Stained Glassworks Green Autry		9x12	11x12	Vigorous, uniform/ Grown for foliage
Coleus	Sultana	New	18x16	26x20	Vigorous, uniform, 10% starting to bloom/ Grown for foliage but produced sparse-moderate blooms by September
Coleus	Wasabi	New	28x18	31x20	Extreme vigor, lodging, non-uniform/ Bloomed strongly from mid-July through the end of the season
Combo Petunia	Kwik Kombo Sanguna Sangria Mix		9x13	9x14	Nice color combination but dominated by white, two plants died back/ Bloomed strongly until mid-September and then finished the season at moderate amount
Combo Petunia Wave Medley	Easy Wave Burgundy Star & Shock Wave Coconut	New	9x10	11x16	Die back in center, Coconut dominates, non-uniform growth & bloom distribution/ Bloomed strongly after planting through early August and then sparsely through mid-August. No blooms were produced after mid-August.
Combo Petunia Wave Medley	Easy Wave Coral Reef & Easy Wave Violet	New	9x12	14x15	Coral very sparse, non-uniform habit, some dieback/ Bloomed strongly until mid-September and then finished the season at moderate amount
Combo Petunia Wave Medley	Easy Wave Mystic Pink & Easy Wave Neon Rose	New	12x13	12x16	Foliage not as deep a green as other Combo Wave Medleys, budworm, dominated by Mystic Pink/ Bloomed strongly until mid-September and then finished the season at moderate amount
Combo Petunia Wave Medley	Easy Wave Mystic Pink & Easy Wave Violet	New	11x14	15x21	Most uniform Combo Wave Medley at this time, budworm, almost no Mystic Pink/ Bloomed strongly until mid-September and then finished the season at moderate amount
Combo Petunia Wave Medley	Easy Wave Neon Rose & Easy Wave Violet	New	11x13	15x20	Almost no Neon Rose present, non-uniform habit, vigorous/ Bloomed strongly until mid-September and then finished the season at moderate amount
Combo Petunia Wave Medley	Easy Wave Rosey Dawn & Shock Wave Denim	New	9x15	11x16	Some bud worm, die back in center, purple not as faded as earlier in season, non-uniform/ Bloomed strongly until mid-September and then finished the season at moderate amount
Combo Petunia Wave Medley	Shock Wave Denim & Shock Wave Pink Shades	New	8x10	10x12	Minimal dieback, denim dominates, some budworm/ Bloomed strongly until mid-September and then finished the season at moderate amount

*New for the 2011 season.

*IMPR for the 2011 season.

Size Data, End-of-Season Comments and Flowering Data for Varieties Grown in the Ground

Genus	Cultivar	New*	7/11 H"xW"	8/8 H"xW"	Comments from late September by Coordinator and Research Associate**/ Summarized Flowering Data for Entire Season
Combo Verbena	Kwik Kombo Lanai Purple Rain Mix		8x13	8x18	Uniform, vigorous, uniform color distribution, full bloom/ Bloomed strongly until mid-September and then finished the season at moderate amount
Coreopsis	Solanna Golden Ball	New	10x6	10x10	75% bloom, uniform habit, double flowers, some lodging/ Bloomed strongly until mid-September and then finished the season at moderate amount
Coreopsis	Solanna Golden Crown	New	11x5	11x9	75% bloom, uniform habit, double flowers, some lodging, low vigor/ Bloomed strongly from mid-July through mid-September and then had moderate flowering
Coreopsis	Solanna Golden Hoop	New	10x5	15x13	Almost still in full bloom, most vigorous coreopsis, flowers held high above plant/ Bloomed strongly until mid-September and then finished the season at moderate amount
Coreopsis	Solanna Golden Ziti	New	14x6	14x11	75% bloom, non-uniform growth, some lodging, 25% plants low vigor/ Bloomed strongly from mid-July through mid-September and then bloomed moderately
Cyperus	Graceful Grasses Baby Tut		35x15	59x33	Vigorous, still looks very showy/ Grown for foliage
Cyperus	Graceful Grasses King Tut		13x11	23x12	Vigorous, still looks very showy/ Blooms began in late July and were strong from August through mid-September and then finished the season at moderate amount
Dahlia	Dahlinova Alabama		8.5x8	10.5x11	Bright yellow, non-uniform habit, some mite damage, some lodging, crowded out by more vigorous varieties/ Bloomed strongly until September and then tapered to sparse blooms
Dahlia	Dahlinova Carolina		11x9	15x17	A couple plants have become open in the center, non-uniform habit, leaves chewed by unknown insect, moderate mite damage, 75% bloom/ Bloomed strongly through early September and then tapered to sparse blooms
Dahlia	Dahlinova Carolina Burgundy		8x6	11x15	Severe mite damage, flowers fade poorly, still in full bloom, 80% of plants have opened in center, spent blooms highly visible/ Bloomed strongly throughout the entire season
Dahlia	Dahlinova Carolina Orange		11x9	11x14	Some mite damage, large holes in leaves from unknown insect, non-uniform growth, spent blooms highly visible, faded blooms/ Bloomed strongly through mid-September and then declined suddenly to sparse blooms
Dahlia	Dahlinova Colorado		7.5x7.5	11.5x11.5	Only one plant still in full bloom, all have Eriophyid mite damage, 30% have severe rot, non uniform growth/ Bloomed strongly until September and then tapered to sparse blooms
Dahlia	Dahlinova Lisa Burgundy		9x7	11x14	Blooms fade poorly, moderate mite damage, spent blooms highly visible, still in full bloom, uniform habit/ Bloomed strongly through mid-September and then finished the season at moderate bloom amount
Dahlia	Dahlinova Lisa Dark Pink		7x4	7x8	Crowded out by more vigorous varieties, uniform, small, still in full bloom, minimal mite damage/ Bloomed strongly through mid-September and then finished the season at moderate bloom amount
Dahlia	Dahlinova Lisa White		10.5x7	11x12	Some Eriophyid mites, 75% bloom, uniform, flower has pale yellow tones/ Bloomed strongly through early September and then tapered to sparse blooms

*New for the 2011 season.

*IMPR for the 2011 season.

**Comments are on first line followed by Flowering Data on second line.

Size Data, End-of-Season Comments and Flowering Data for Varieties Grown in the Ground

Genus	Cultivar	New*	7/11 H"xW"	8/8 H"xW"	Comments from late September by Coordinator and Research Associate**/ Summarized Flowering Data for Entire Season
Dahlia	Dahlinova Montana		9.5x8	12x16	Some Eriophyid mites, 75% bloom, non-uniform habit, some flowers more orange than yellow (inconsistent color)/ Bloomed strongly through early September and then tapered to sparse blooms
Dahlia	Dahlinova Texas		9x8	11x11	Minimal mite damage, still in full bloom, non-uniform habit, large holes in leaves from unknown insect, bright flower fades well, spent blooms not highly visible/ Bloomed strongly through mid-September and then declined suddenly to sparse blooms
Dahlia	Goldalia Orange 10		8x7	8x10	Some mite damage, crowded out by more vigorous varieties, faded flowers, non-uniform habit/ Bloomed strongly through early September and then tapered to sparse blooms
Dahlia	Goldalia Rose Bicolor		12x9	17x12	Minimal mite & powdery mildew, blooms at 40% of full bloom, habit relatively uniform, spent blooms not very visible, color very inconsistent from completely white to solid color and everything in between/ Bloomed strongly from late July through mid-September and then declined suddenly to sparse blooms
Dahlia	Goldalia Scarlet		9.5x6	11x15	Spent blooms visible, mite & powdery mildew minimal, 5% dead- possibly from rotting off, still in full bloom/ Bloomed strongly through mid-September and then finished the season at moderate bloom amount
Dahlia	Happy Days Pink	New	8x4	9x10	50% plants dead or near-death, low vigor, minimal mite damage, flowers sparse, foliage nice & dark/ Bloomed strongly the later half of July then tapered to moderate bloom in August and sparse blooms in September
Dahlia	Happy Days Purple	New	13x6	14x13	Minimal mite damage, flowers sparse, foliage a nice dark contrast, non-uniform growth, 10% dead, low vigor/ Blooms peaked the later half of July and only sparse blooms were present from mid-August through the end of the season
Dahlia	Hypnotica Bronze Bi		14x9	17.5x17	Some Eriophyid mites, uneven bloom distribution, several plants have become open in the center and lodged, spent blooms are not very visible, vigorous/ Bloomed strongly until early August and then finished at moderate bloom amount
Dahlia	Hypnotica Coral		11x7.5	20x15	Flower fades nicely, non-uniform habit, still at 75% bloom, moderate mites, minimal powdery mildew, spent blooms not very visible, several plants have opened in center/ Bloomed intermittently throughout the season, spending most of the season at moderate bloom amount
Dahlia	Hypnotica Dark Night		14x9	22x17	Blooms a nice deep, dark color, non-uniform growth, spent blooms not visible, still at 75% bloom, minimal mite damage/ Spent most of the season at moderate bloom amount with peak blooms occurring late July and early September
Dahlia	Hypnotica Lavender		12x9	17x15	Large bright fade-resistant flowers, minimal mite & powdery mildew, large leaves, vigorous, a couple of plants have become open in center, only at 50% bloom, spent blooms not visible/ Bloomed strongly through early August then declined to moderate amount until late September when only sparse blooms were left
Dahlia	Hypnotica Orange		10x9	16.5x18	Several plants have become open in center, vigorous, still 75% bloom, minimal mite damage, non-uniform growth/ Bloomed strongly through mid-September and then then bloomed moderately
Dahlia	Hypnotica Purple Bicolor		10.5x7	17x13	Vigorous, flowers fade nicely, only at 50% bloom, habit fairly uniform, minimal mite damage/ Bloomed strongly after planting through early August then declined to moderate. Entered a second flush of bloom early in September and then declined suddenly to sparse blooms late in the season

*New for the 2011 season.

*IMPR for the 2011 season.

**Comments are on first line followed by Flowering Data on second line.

Size Data, End-of-Season Comments and Flowering Data for Varieties Grown in the Ground

Genus	Cultivar	New*	7/11 H"xW"	8/8 H"xW"	Comments from late September by Coordinator and Research Associate**/ Summarized Flowering Data for Entire Season
Dahlia	Hypnotica Rose Bi		13x9	16x12	Powdery mildew covers 50% of leaves, spent blooms highly visible, 15% dead, minimal mite damage, some rot, beautiful color fades well, non-uniform habit/ Bloomed strongly through early September and then tapered to sparse blooms
Dahlia	Lucky Face		14x7	14x14	Non-uniform habit, non-uniform color, some flowers striped others solid (50-50 ratio), blooms fade poorly, minimal mite damage, 75% of plants have lodged, 20% rotted off/ Bloomed strongly from mid-July through early September and then tapered to sparse blooms
Dahlia	Lucky Heart		12x7	17x16	Non-uniform growth, some mites & powdery mildew, blooms often hidden by foliage, bloom color inconsistent, 50% variegated flower - 50% solid colored flower/ Bloomed strongly from mid-July through mid-September and then declined suddenly to sparse blooms
Dianthus	Garden Spices Coral		11x6	16x12	Vigorous, foliage greener rather than gray, entering second flush of bloom for season, no lodging, uniform habit/ Bloomed strongly from mid-July until early September when blooms declined to moderate amount
Dianthus	Garden Spices Fuschia	New	11x8	12x13	Minimal lodging, uniform habit, moderate vigor/ Bloomed strongly from mid-July to late August and then finished the season at moderate amount
Dianthus	Garden Spices Marble		8.5x5	11x10	Variegated flowers not consistent - 10% are solid colored, minimal lodging, uniform habit/ Bloomed strongly from mid-July to late August and then finished the season at moderate amount
Dianthus	Garden Spices Pink Bicolor		9x8	12x13	Entering second flush of bloom for season, fine textured foliage, minimal lodging, uniform habit/ Bloomed strongly until early September when blooms rapidly declined to sparse
Dianthus	Garden Spices Pink Improved		11x7	13x14	Entering second flush of bloom for season, fine textured foliage, minimal lodging, uniform habit/ Bloomed strongly until early September when blooms rapidly declined to sparse
Dianthus	Garden Spices Red		9x5	14x12	Entering second flush of bloom for season, some lodging, uniform habit/ Bloomed strongly from late July through August and then finished the season at moderate amount
Dianthus	Garden Spices Salmon Pink		11x5	11x8	Entering second flush of bloom for season, fine textured foliage, minimal lodging, uniform habit/ Bloomed strongly until early September when blooms declined to moderate amount
Dianthus	Kahori Kahori		5x4	5x7	Very small, compact plants, still blooming in September, healthy, uniform habit/ Bloomed strongly throughout the entire season
Diascia	Darla Deep Salmon 11		12x9	10x15	Low vigor, 75% dead, rest of plants still in full bloom, low growing/ Bloomed strongly through mid-August and then finished the season with only sparse blooms
Diascia	Darla Red IMP	New	8x11	9x18	Vigorous, a handful of blooms, some chlorosis, mounding habit/ Bloomed strongly after planting until mid-August then moderate blooms to mid-September and then few in late September
Diascia	Darla White 11		8x10	23x13	Only a handful of blooms left, several plants have become open, non-uniform habit/ Bloomed strongly from mid-July through mid-September and then finished the season with sporadic blooming
Euphorbia	Breathless Blush	2010	9x12	14x12	Looks great, many flowers, uniform, unique color/ Bloomed strongly throughout the entire season
Euphorbia	Breathless White	2010	10x10	10x10	Vigorous, many flowers, uniform, near perfect/ Bloomed strongly from mid-July through the end of the season

*New for the 2011 season.

*IMPR for the 2011 season.

Geranium (Zonal)	Survivor Fuchsia		8x7	11x12	Full bloom, uniform, moderate vigor/ Bloomed strongly from mid-July through the end of the season
Geranium (Zonal)	Survivor Hot Pink		8x5	15x12	Full bloom, uniform, moderate vigor/ Bloomed strongly from mid-July through the end of the season
Geranium (Zonal)	Survivor Marine		10x10	12x15	Full bloom, non-uniform, two plants have very low vigor/ Bloomed strongly from mid-July through the end of the season
Geranium (Zonal)	Survivor Pink		9x8	12x12	A few blooms left, 50% died out/ Bloomed strongly from mid-July through the end of September and then had moderate blooming
Geranium (Zonal)	Survivor Salmon Pink		10x8	11x15	50% bloom, vigorous, non-uniform/ Bloomed strongly from mid-July through mid-September and finished the season at moderate amount
Geranium (Zonal)	Survivor Salmon Sensation		7x6	8x11	Full bloom, vigorous, flowers held high above plant/ Bloomed strongly from mid-July through mid-September and finished the season at moderate amount
Geranium (Zonal)	Survivor White		9x8	12x14	Uniform, 75% bloom, some mild chlorosis/ Bloomed strongly from mid-July through the end of the season
Geranium (Zonal)	Tango Dark Red		10x11	10x17	A few flowers, suspected chill damage indicated by purple leaf edges, mounding habit/ Bloomed strongly from mid-July through August and then tapered to sparse blooms by the end of the season
Geranium (Zonal)	Tango Deep Pink (Eclipse)		6x8	8x15	Non-uniform, several with very low vigor, full bloom/ Bloomed strongly from mid-July through August and then finished the season at moderate amount
Geranium (Zonal)	Tango Neon Purple		10x10	14x15	Full bloom, uniform/ Bloomed strongly from mid-July through the end of the season
Geranium (Zonal)	Tango Red 09		9x6	11x12	Low vigor, some flowers, non-uniform/ Bloomed strongly from mid-July through mid-September and then had only sparse blooms at the end of the season
Geranium (Zonal)	Tango Rose Splash (Eclipse)		8x8	10x13	Almost full bloom, upright, non-uniform/ Bloomed strongly from mid-July through mid-September and finished the season with sparse blooms
Geranium (Zonal)	Tango Salmon (Montevideo)		6x6	11x11	75% bloom, non-uniform, not vigorous/ Bloomed strongly from mid-July through mid-September and finished the season at moderate amount

*New for the 2011 season.

*IMPR for the 2011 season.

Size Data, End-of-Season Comments and Flowering Data for Varieties Grown in the Ground

Genus	Cultivar	New*	7/11 H"xW"	8/8 H"xW"	Comments from late September by Coordinator and Research Associate**/ Summarized Flowering Data for Entire Season
Marigold	Babuda Deep Gold		9x10	13x14	All plants have lodged with some stems breaking, still in full bloom, non-uniform/ Produced no blooms until mid-July and then bloomed strongly through the end of the season
Marigold	Babuda Yellow		13x11	17x11	Several plants have opened in the center with stems breaking, still in full bloom, suspected chill damage as some leaves are tipped purple/ Bloomed strongly from the end of July through early September and then tapered to sparse blooms by the end of the season
Marigold	Bali Gold		27x14	38x23	Still in full bloom, vigorous, non-uniform habit/ Produced no blooms until mid-July and then bloomed strongly through the end of the season
Marigold	Bali Orange		18x13	27x17	Vigorous, uniform, minimal lodging, full bloom/ Bloomed strongly from mid-July through the end of the season
Marigold	Bali Yellow		13x11	21x13	Two plants wilting & dying, still in full bloom, vigorous uniform habit/ Bloomed strongly from very late July through August and then tapered to sparse blooms by the end of the season
Marigold	Bonanza Deep Orange	New	12x14	20x16	Compact, still in full bloom, vigorous, non-uniform habit/ Produced no blooms until late July and then bloomed strongly from August through mid-September and finished the season at moderate amount
Marigold	Discovery Orange		12x11	17x9	50% dead or dying of unknown cause, suspected chill damage indicated by purple tipped leaves, still in full bloom/ Produced no blooms until mid-July and then bloomed strongly through mid-September and finished the season at moderate amount
Marigold	Discovery Yellow		19x14	33x24	75% dead, crowded out by more vigorous varieties/ Bloomed strongly from mid-July through the end of the season
Marigold	Moonstruck Deep Orange	New	16x13	24x13.5	75% dying or dead of unknown cause, still blooming/ Produced no blooms until very late July and then bloomed strongly from August through the end of the season
Marigold	Moonstruck Lemon Yellow	New	16x10	21x15	25% still alive, crowded out by more vigorous varieties/ Produced no blooms until the end of July and then bloomed strongly from early August through September
Marigold	Narai Orange		6x10	11x9	25% dead of unknown cause, full bloom, lodging/ Bloomed strongly throughout the entire season
Marigold	Narai Yellow		19x15	37x27	Several plants have opened in the center with stems breaking, still in full bloom, suspected chill damage as some leaves are tipped purple/ Produced no blooms until mid-July and then bloomed strongly through the end of the season
Marigold	Pagoda Yellow		15x20	57x37	Overpowered by more vigorous plants, 40% dead, still in full bloom/ Bloomed strongly from late July through the end of the season
Mecardonia	Gold Dust		10x11	11x8	Many flowers, vigorous, uniform, looks great/ Bloomed strongly from mid-July through the end of the season
Melampodium	Casino Light Yellow		11x9	20x24	Plants becoming open in center, covered in blooms, vigorous/ Bloomed strongly throughout the entire season

*New for the 2011 season.

*IMPR for the 2011 season.

Size Data, End-of-Season Comments and Flowering Data for Varieties Grown in the Ground

Genus	Cultivar	New*	7/11 H"xW"	8/8 H"xW"	Comments from late September by Coordinator and Research Associate**/ Summarized Flowering Data for Entire Season
Mimulus	Buttercup	New	8x13	9x16	Still in full bloom, wild/sprawling habit, vigorous and healthy/ Bloomed strongly through mid-August and then bloomed sparsely through the end of the season
Nemesia	Confection Purple	New	11.5x9	13x12	Severe lodging, chlorosis only on about 20%, non-uniform flowering & habit/ Bloomed strongly through mid-September and then had moderate blooming
Nemesia	Confection White		11x10	17x16	Vigorous, some lodging, widespread chlorosis, non-uniform flowering & habit/ Bloomed strongly through mid-August and then tapered to sparse blooms by the end of September
Nicotiana	Perfume Lime		23x17	22x18	Vigorous, compact habit, still in full bloom/ Bloomed strongly throughout the entire season
Nicotiana	Whisper Mix		17x9	24x14	A couple plants have lodged, still in full bloom, large healthy basal leaf rosettes/ Bloomed strongly throughout the entire season
Nierembergia	Augusta Blue Skies		10x10.5	13x14	90% dead, crowded out by more vigorous varieties, has some powdery mildew/ Bloomed strongly through August and then had moderate blooming
Ornamental Pepper	Basket of Fire	New	11x12	17x16	Lots of fruit but 95% is still green/ Bloomed strongly through mid-September and then had moderate blooming
Ornamental Pepper	Chenzo	New	14x12	27x20	Minor fruiting, aggressive plant/ Bloomed moderately until mid-August then bloomed strongly through the end of the season
Ornamental Pepper	Cute Stuff Red (sweet pepper)	New	11x12	17x16	Moderate fruiting, fruit is still mostly green, not showy, non-uniform/ Blooms were sparse through July and then bloomed at maximum amount from August through the end of season
Ornamental Pepper	Loco	New	13x10	18x14	Abundant purple fruit is showy/ Bloomed strongly from late July through the end of the season
Ornamental Pepper	Sweet Heat (hot pepper)	New	20x10	24x20	Non-uniform, lodging but has moderate amounts of large red peppers/ Bloomed strongly from mid-July through the end of the season
Osteospermum	Akila Lavender Shades	New	16x14	18x16	Full bloom, several plants becoming open, 10% dead/ Blooms peaked for the later half of July and then had moderate blooming
Osteospermum	Akila Mix	New	5x10	5x11	Full bloom, some interveinal chlorosis, non-uniform habit, one plant with root rot/ Bloomed strongly from mid-July through mid-September and then had moderate blooming
Osteospermum	Akila Purple	New	12x12	13x15	Non-uniform habit, some chlorosis, a couple of plants open in center, 75% bloom/ Bloomed strongly through July then maintained moderate amount through the end of the season
Osteospermum	Margarita Caramel		10x8	13x15	40% bloom, non-uniform habit with 50% plants lacking vigor/ Bloomed intermittently, peaking in mid-July through mid-August and then spent most of the season with sparse blooms
Osteospermum	Margarita Cool purple		12x10	13x12	Several flowers, uniform habit, all healthy/ Bloomed strongly from late July through early August and then maintained moderate blooms through the end of the season
Osteospermum	Margarita Dark Pink		8x7	14x14	10% dead, scattered blooms, non-uniform habit, almost all plants becoming open/ Blooms peaked in early August and then maintained moderate amount through the end of the season

*New for the 2011 season.

*IMPR for the 2011 season.

Size Data, End-of-Season Comments and Flowering Data for Varieties Grown in the Ground

Genus	Cultivar	New*	7/11 H"xW"	8/8 H"xW"	Comments from late September by Coordinator and Research Associate**/ Summarized Flowering Data for Entire Season
Osteospermum	Margarita Dark Pink Bi		10x10	11x13	Powdery mildew, 60% dead, remaining plants in full bloom/ Blooms peaked from mid-July through early August and then only sparse flowers for the rest of the season
Osteospermum	Margarita Lilac		10x9	15x15	Full bloom, a couple of plants dying out, non-uniform habit/ Bloomed strongly mid-July through mid-August and then spent the rest of the season with sparse blooms
Osteospermum	Margarita Pink Flare		9x10	14x18	Few flowers, 30% dead/dying, otherwise uniform growth/ Blooms peaked at moderate from mid-July through early August and then only sparse flowers for the rest of the season
Osteospermum	Margarita Purple		10.5x10	14x13	Several flowers, some chlorosis, one plant becoming open, otherwise uniform habit/ Bloomed strongly after planting through early August and then maintained moderate amount through the end of the season
Osteospermum	Margarita Sunset		9x10	14x15	10% of plants dead, a few scattered flowers, uniform habit/ Bloomed strongly mid-July through mid-August and then spent the rest of the season with sparse blooms
Osteospermum	Margarita White		12x10	16x18	Only a handful of flowers, non-uniform habit with some falling over, 20% dying off/ Bloomed intermittently, peaking in mid-July and then spent most of the season with sparse blooms
Osteospermum	Margarita White Spoon		9x7	13x14	Scattered blooms, large leaves, non-uniform habit, several plants becoming open/ Bloomed strongly mid-July through early August and then the rest of August with sparse blooms but entered a second flush of strong blooms in September
Osteospermum	Margarita Yellow		10x10	10x10	Only a handful of flowers left, compact plants becoming open in center, all healthy/ Bloomed intermittently, peaking in mid-July and then spent most of the season with sparse blooms
Osteospermum	Serenity Golden	New	9x8	11x12	Only a handful of flowers left, non-uniform habit, some plants open in center/ Bloomed intermittently, peaking in mid-July through early August and then spent most of the season with sparse blooms
Osteospermum	Serenity Peach Magic	New	10x8	12x15	Scattered blooms, uniform compact habit, all healthy/ Bloomed strongly in mid-July and then spent the rest of the season at moderate amount
Osteospermum	Serenity Pink Magic	New	10x10	15x16	A handful of blooms left, non-uniform habit, 25% of plants dead or dying/ Bloomed strongly mid-July through mid-August and then spent the rest of the season with sparse blooms
Osteospermum	Serenity Rose Magic	New	9x8	12x12	A few scattered flowers, a couple plants dead, uniform habit/ Bloomed strongly in mid-July and then spent the rest of the season with sparse blooms
Osteospermum	Summertime Bronze Charme		9x9	12x13	A handful of flowers left, non-uniform growth, several plants becoming open in center/ Bloomed strongly in mid-July through early August and then spent the rest of the season with sparse blooms
Osteospermum	Summertime Crème		10x13	13x16	9/21 observed beginning of second bloom flush, sparse flowers but many buds, uniform mounding habit/ Bloomed intermittently, peaking in mid-July and then spent most of the season with sparse blooms
Osteospermum	Summertime Red Velvet		10x12	16x13	Powdery mildew, a handful of blooms, non-uniform habit with several plants becoming open/ Bloomed strongly from late July through early August and then maintained moderate blooms through the end of the season
Osteospermum	Summertime Royal Purple		10x7	10x12	Blooms scattered throughout, 10% dying, uniform habit/ Bloomed strongly the later half of July and then intermittently between sparse and moderate levels for the rest of the season

*New for the 2011 season.

*IMPR for the 2011 season.

Size Data, End-of-Season Comments and Flowering Data for Varieties Grown in the Ground

Genus	Cultivar	New*	7/11 H"xW"	8/8 H"xW"	Comments from late September by Coordinator and Research Associate**/ Summarized Flowering Data for Entire Season
Osteospermum	Summertime Soft Pink		7x8	12*12	Scattered flowers throughout, 25% dead, otherwise vigorous with plants becoming open in center/ Bloomed strongly mid-July through mid-August and then spent the rest of the season with sparse blooms
Osteospermum	Summertime Swing Royal White		11x14	17x16	Very large leaves, 75% dying, interveinal chlorosis & wilt, only a few flowers/ Bloomed strongly mid-July through early August and then the rest of August with sparse blooms but entered a second flush of strong blooms in September
Osteospermum	Summertime Yellow		10x7	10x11	Scattered flowers, non-uniform habit, several plants becoming open in center/ Bloomed intermittently, peaking in mid-July and then spent most of the season with sparse blooms
Osteospermum	Tradewinds Bronze	New	8x7	10x10	Only a couple of blooms left, non-uniform growth habit, a couple of plants dying off/ Bloomed strongly in mid-July and then spent the rest of the season with sparse blooms
Osteospermum	Tradewinds Cinnamon	New	9x9	11x15	Spent flower heads very conspicuous, only a handful of blooms, 10% of plants are dead or dying/ Bloomed strongly mid-July through early August and then spent the rest of the season with sparse blooms
Osteospermum	Tradewinds Purple Bicolor		9x10	14x14	Full bloom, several plants becoming open, 10% dead/ Blooms peaked from mid-July through early August and then only sparse flowers for the rest of the season
Osteospermum	Tradewinds Terracotta 10		10x11	13x13	No blooms, 25% dying off, non-uniform habit/ Bloomed strongly in mid-July and then spent the rest of the season with sparse blooms
Osteospermum	Tradewinds White		7x6	13x14	Sparse flowers, 20% dying off, uniform habit/ Bloomed intermittently throughout the season but spent most of the season at moderate bloom amount
Osteospermum	Tradewinds Yellow		10x10	13x15	50% bloom, non-uniform habit, all look healthy, moderate vigor/ Bloomed intermittently, peaking in mid-July and then spent most of the season with sparse blooms
Osteospermum	Voltage Yellow	2010	12x9	16x14	75% bloom with more coming from buds, uniform habit, healthy, flowers held high above foliage/ Bloomed intermittently, peaking in mid-July through early August and then spent most of the season with sparse blooms
Otomeria	O'Premiera Baby Pink (7-62)	New	8x9	10x14	Low vigor, few flowers/ Bloomed strongly from mid-July through mid-September and then declined suddenly to sparse blooms
Otomeria	O'Premiera Pink (8-407)	New	9x7	9x9	Some chlorosis, almost no flowers, unattractive/ Bloomed strongly from mid-July through early September and then tapered to sparse blooms by the end of the season
Otomeria	O'Premiera Ruby (9-567)	New	11x6	12x11	Low vigor, some chlorosis, almost no flowers, unattractive/ Bloomed strongly from mid-July through early September and then tapered to sparse blooms by the end of the season
Otomeria	O'Premiera White (7-139)	New	7x10	6x13	Few flowers, moderate vigor, not very showy/ Grown for foliage
Pennisetum	Graceful Grasses Vertigo		16x14	51x33	Very vigorous variety, grass has angular texture as it grows upright and then foliage bends sharply to the ground. Interesting purple and green variegation, no disease, uniform habit/ Grown for foliage, did not bloom
Pennisetum	Skyrocket		10x11	29x27	Vigorous white variegated grass, arching habit, plumes have slight purple tinge and cover entire plant, uniform habit/ Grown for foliage but plumes were present from early August through the end of the season

*New for the 2011 season.

*IMPR for the 2011 season.

Size Data, End-of-Season Comments and Flowering Data for Varieties Grown in the Ground

Genus	Cultivar	New*	7/11 H"xW"	8/8 H"xW"	Comments from late September by Coordinator and Research Associate**/ Summarized Flowering Data for Entire Season
Verbena (Upright)	Lanai Upright Pink	New	9x11	11x12	Average overall appearance/ Bloomed strongly until mid-August and then finished the season at moderate amount
Verbena (Upright)	Lanai Upright Rose with Eye	New	8x10	10x27	Non-uniform, moderate flowering/ Bloomed strongly until mid-September and then had moderate blooming
Vinca	Nirvana Pink Blush		9x10	13x13	Only 25% have not gotten root rot, those alive are still blooming/ Produced no blooms until mid-July. Bloomed strongly from late July through the end of the season
Vinca	Nirvana Red		11x12	13x12	Only 2 plants are still alive and blooming, all the rest have root rot/ Bloomed strongly through early September and then tapered to sparse blooms by the end of the season
Vinca	Nirvana Rose		5x9	10x11	50% have root rot, those alive are still blooming/ Bloomed strongly through early September and then tapered to sparse blooms by the end of the season
Zea	Field of Dreams	New	26x20	62x20	All plants dead with faded foliage on 9/16, corn popular with squirrels, crowded out by more vigorous varieties but performed identically in the new variety display where it was not crowded out./ Corn was present from early August through the end of the season
Zinnia	Double Zahara Cherry	2011	11x12	25x16	Not vigorous, 40% dead or dying, scattered blooms/ Bloomed strongly from late July through mid-September and then had moderate blooming
Zinnia	Double Zahara Fire	2011	11x12	20x15	25% have opened in center, full bloom, large flowers, red flowers fade to orange, vigorous/ Bloomed strongly from late July through the end of the season
Zinnia	Double Zahara Mix	2009	8x8	25x12	50% dead, yellow predominant in mix, lodging/ Bloomed strongly from mid-July through early September and then had moderate blooming
Zinnia	New Orange	New	10x10	21x18	Non-uniform habit, crowded out by other varieties, still in full bloom/ Bloomed strongly from late July through mid-September and then had moderate blooming
Zinnia	New White		12x9	15x16	Full bloom, lodging, 10% dead/ Bloomed strongly from late July through early August and then maintained sparse blooms for the rest of the season
Zinnia	New Yellow	New	13x12	22x18	Vigorous, wild habit, full bloom, leggy stems/ Bloomed strongly from late July through mid-September and then had moderate blooming
Zinnia	Profusion 7 Color Mix		9x12	18x14	30% dead, white crowded out of mix, non-uniform, all plants becoming open/ Bloomed strongly from late July through early September and then had moderate blooming
Zinnia	Profusion Double Cherry		11x11	21x15	Flowers fade so much they look bleached, 25% dead, lodging, full bloom/ Bloomed strongly from late July through mid-September and then had moderate blooming
Zinnia	Profusion Double Fire		9x8	20x14	Almost uniform habit aside from a few plants becoming open, full bloom, red flowers fade to orange/ Bloomed strongly from very late July through the end of the season
Zinnia	Profusion Double Golden		12x8	18x11	10% dead, all plants flopped over, still in full bloom/ Bloomed strongly throughout the entire season
Zinnia	Profusion Double White		13x11	14x12	Only one plant partially alive but still blooming/ Bloomed strongly throughout the entire season

*New for the 2011 season.

*IMPR for the 2011 season.
