Colorado State University

2021 Perennial Trial Garden Performance Report

Dr. James E. Klett, David Staats and Emily Gritters

Introduction

Dr. James E. Klett is the faculty coordinator for the Annual and Perennial Flower Trial Gardens. In 2000, the annual trial garden was moved from its site at PERC (Plant Environmental Research Center) to the park located at the corner of Remington and Lake Street. The relocation of the annual garden to this more spacious and visible site furthered its mission by more effectively extending education, research and outreach to students, home gardeners, Master Gardeners, community members, and Green Industry personnel. In 2007, the Perennial Trials were created in response to increased interest in new perennial cultivars. The Perennial Trials are located directly across the street to the east from the Annual Trial Garden in front of the University Center for the Arts. It is managed by staff from the CSU Department of Horticulture and Landscape Architecture with substantial oversight from the Perennial Trial subcommittee which is part of the Annual Flower Trial Garden committee. Each entry must have been introduced within the past three years and is evaluated for three complete years and two winters to determine hardiness and consistent landscape performance.

The purpose of the trial garden is to evaluate the performance of herbaceous perennial plant species and cultivars under our unique Rocky Mountain environmental conditions. Our growing conditions are characterized by high altitude, intense solar radiation, drying winds, severe hailstorms, large fluctuations between day and night temperatures, and a season-long need for irrigation. Plants were evaluated for plant vigor, uniformity, floriferousness, and tolerance to environmental and biotic stresses. Data (ratings and photos) were collected every two weeks (May to late September). Plants were also evaluated once a month by some members of the Perennial Trial subcommittee. The Perennial Trial subcommittee met November 19th, 2021 to review data and photos to vote on which entries should be designated a “Top Performer” from the planting done in 2019 for the year 2021.

The project is mostly funded by the entry fees collected from the plant breeding companies and perennial propagators who have chosen to participate in the trials. Additional financial assistance and supplies for the trial operations are donated by a number of sources. These sources include individuals, various foundations, nurseries, greenhouse growers and plant and seed production companies from across the nation. The trial garden at Colorado State University receives no operating dollars directly allocated from state funds. Some operational and staff dollars have come from the Colorado State

Agricultural Experiment Station, Extension, the College of Agricultural Sciences, and the Department of Horticulture and Landscape Architecture.

Acknowledgements

The Department of Horticulture and Landscape Architecture at Colorado State University would first like to thank the many plant and seed companies who continue to participate in the trials year after year. Without their cooperation and support, the research done at the trial garden would not be possible. This year, in 2021 the following 18 plant and seed companies participated in the trials, entering 125 new varieties of herbaceous perennial plants for a total of 291 entries in the trials:

Benary+	Keift Seed
Danziger	Kientzler
Darwin Perennials	Pacific Plug and Liner
DümmenOrange	PlantHaven International, Inc.
Eason Horticulture Resources	Plant Select®
Flamingo Holland	Star Roses and Plants
Garden Choice	Syngenta Flowers
Gulley's Greenhouse	Terra Nova Nurseries
J. Berry Nursery	Walters Gardens/Proven Winners

In Kind Donations:

We would like to recognize several companies that have donated supplies to the program.

Blackmore Inc. and Greencare Fertilizers - Donated water-soluble fertilizer for use in the garden and greenhouse.

ICL Specialty Fertilizer - Donated Osmocote® slow-release fertilizer used in the beds and containers.

Harrell's – Donated water soluble and slow-release fertilizers for containers.

Tagawas - Donated potting media used to grow-on vegetative plugs.

Organix - Donated organic media for sun beds and containers.

Welby Gardens - Grew all AAS seed plants at a substantially reduced cost for the trials.

Browns Greenhouse, Kiyota's Greenhouse, Dutch Heritage Gardens - Propagated seed varieties at a substantially reduced cost for the trials.

Griffin- Donated small containers and flats.

In Appreciation

The Department of Horticulture and Landscape Architecture would like to recognize and thank the following people for making the trial gardens happen this year.

Emily Gritters – Horticulture Undergraduate and 3-Year Perennial Trial Coordinator

Sheila Prentice – Graduate Student and Annual Trial Garden Coordinator

The Trial Garden Staff – Sam Kelly, Courtney Dunbar, Tate Erickson

David Staats – Horticulture Research Associate

All the Larimer & Weld County Master Gardeners who volunteered their time and hard work.

Browns Greenhouse, Kiyota Greenhouse, Dutch Heritage Gardens, Welby Gardens, and all of their staff.

The Trial Garden Advisory Committee –Dan Gerace (Welby Gardens), Al Gerace (Welby Gardens), Diana Reavis (Eason Horticultural Resources Inc.), Duane Sinning (Colorado Department of Agriculture), Galen Dokter (Vaughan’s Horticulture), Gene Pielin (Gulley Greenhouse), Jim Devereux (Green-Fuse Botanicals), Milan Clickingbeard (Tagawa Greenhouses), Karl Trellinger (Syngenta Flowers), Bridget Blomquist (Denver Botanic Gardens), Mark Seguin (Sakata Ornamentals), Ron Brum (Ball Horticultural Company), Amy Gonzales (Syngenta Flowers), Susan Stauber (Ball Horticultural Company), Traicer Gray (Elitch Gardens), Julie Lehman (Denver City Park Greenhouse), Richard Anderson (Lifescape Colorado), Diana Shull (Dummen Orange), Holly Shields (Denver City Parks), Steven Engel (PanAmerican Seed), Beth Gulley (Gulley Greenhouse), Kathy McKay (Flamingo Holland), Sean Moody (Ceres Landcare), Stephanie Guterrez (Designs By Stephanie), Ryan Giacomini (Brown’s Greenhouse), Dale Kiyota (Kiyota Greenhouse), Aaron Biven (Altman Plants), John Navant (Highland Hills Park and Rec), Debra Pfaff (City of Broomfield), Shalene Hiller (City of Westminster), Emily Mason (Dummen Orange), Chris Berg (Dummen Orange), Aki Okamoto (Tagawa Greenhouses), Mandy Gerace (Syngenta Flowers), Nora Lozada (Flamingo Holland), David Hartley (CSU Emeritus), Scott Fulton (Botany Lane Greenhouse)

And a special thanks to those who served on the Perennial Trial Sub-Committee - Aaron Bivens from Altman Plants, Bridget Blomquist from Denver Botanic Gardens, Ron Brum and Susan Stauber from Ball Horticultural Company, Dan Gerace from Welby Gardens, Mandy Gerace from Syngenta Flowers, Beth Gulley and Gene Pielin from Gulley Greenhouse, Sean Moody from Ceres Land Care, Richard Anderson from the Lifescape Colorado, Galen Dokter from Vaughan’s Horticulture, Diana Reavis from Eason Horticultural Resources, Shalene Hiller from City of Westminster, Kathy McKay from Schoneveld and Flamingo Holland, Nora Lozada from Flamingo Holland, Beverly Shaw from Plant Select and David Hartley from Colorado State University Emeritus.

Perhaps most importantly, much thanks and appreciation goes to the Perennial Trial Garden staff at the university that has worked diligently to prepare and maintain the garden. These people include:

Horticulture Research Associate
Perennial Trial Coordinator
Perennial Trial Garden Student Worker

David Staats
Emily Gritters
Sarah Mendus

For further information on the Annual and Perennial Flower Trial Garden at Colorado State University, feel free to write, call or e-mail:

An Invitation

You are cordially invited to tour the garden at your leisure to enjoy the color and ambiance of a place that is like no other in Colorado. Any suggestions you may have for future programs or improvements are strongly encouraged, so please feel free to contact us with your ideas.

Tony Koski – Interim Department Head

Phone: (970) 491-7018

E-mail: jim.klett@colostate.edu

2021 CULTURAL DATA

Growing

All seeds were sent to Brown's Greenhouse, Kiyota Greenhouse, and Dutch Heritage Gardens and Welby Garden in January and February 2021 for germination and growing-on in their greenhouses into cell packs or 50-cell trays. Seeds were separated between the four greenhouses for germination but all varieties of the same genus were sent to one location. Seed varieties from these four companies were all received on June 7, 9 & 10 and planted in the garden starting on June 11. All vegetative varieties were received as plugs and transplanted into 4.5" pots shortly after arriving at Colorado State University from late March to mid-April.

Fertilization in Greenhouses

Dosatron® fertilizer injectors rated at 7 GPM were used in the greenhouses to fertilize plants each day they were watered, with the exception that every weekend they were watered with clear water. Greencare 14-4-14 water soluble fertilizer was used. Plants were grown in the greenhouses at the CSU Horticulture Center. They received fertilization at a rate of 200 ppm.

Chemicals Used in Greenhouses

A drench of Banrot® (6 oz/gallon) was applied to all vegetative plugs immediately after arrival and prior to potting up as a preventative fungicide treatment.

This year there were some minor pest issues in the greenhouse. Mainspring® was applied as a treatment for white flies and aphids on 4/15 and 5/7. Marathon® II was applied as a treatment for aphids on 4/22. Safari® was applied as a treatment for aphids and thrips on 6/4 and 6/21. Flagship® was applied as a treatment for aphids and thrips on 6/25.

Soil Amendments and Preparation

All beds were raked clean of old mulch, planting material and weeds prior to planting. Where necessary, RoundUp® was sprayed on weeds. Prior to planting, 1.5-2" of new Grower's Mix media from Organix Supply Inc. was added to all sun beds.

Monthly Temperatures and Precipitation for Winter 2019-2020

Month	Avg. Maximum Temperature	Avg. Minimum Temperature	Precipitation (Inches)
October	59.1 °F	29.4 °F	0.94
November	50.6 °F	25.0 °F	1.79
December	44.1°F	20.9 °F	0.57
January	47.5°F	22.6 °F	0.01
February	43.7 °F	18.6 °F	0.69
March	56.0 °F	29.3 °F	1.29

Monthly Temperatures and Precipitation for Summer 2021

Month	Avg. Maximum Temperature	Avg. Minimum Temperature	Precipitation (Inches)
April	61.4° F	32.4° F	2.15
May	68.5° F	44.0° F	5.52
June	86.4° F	55.2° F	0.48
July	89.0° F	60.1° F	0.65
August	87.2° F	56.9° F	0.64
September	83.4° F	49.9° F	0.56

Data Collection Methods

Plant Size

Height and width measurements were taken once toward the end of the growing season on August 31st, 2021. This was done to determine the approximate average size and growth performance of the mature plants. For plants that were planted in 2021, their height and width were also taken to get a feel for how their first season growth performance was. For consistency in bed data collection, the third plant from the front of the left row was measured; however, if that plant was noticeably smaller or larger than average, an alternate plant was selected for measurement. Measurements were taken at the highest and widest parts of the plant, including any flowers.

Soil Samples

Numerous samples were taken from individual ground beds on August 8th, 2020 and were combined into a single sample and submitted to the CSU Soil Testing Lab. The results are as follows:

Soil Analysis

Location	pH	E.C. mmhos/ cm	Lime Estimate	% OM	NO ₃ -N ppm	P ppm	K ppm	Zn ppm	Fe ppm	Mn ppm	Cu ppm	Texture
Perennial Beds	7.0	0.6	Low	15.0	50.4	719	1029	51.8	496	15.0	8.84	Sandy Clay Loam

Performance Evaluation

Photos and data on plants and flowers were collected on a bi-weekly basis from May to late September. Dead plants in the trial were not considered in the bi-weekly evaluation; thus, the ratings given only reflect the live plants. Members from the Perennial Trial subcommittee also came in monthly and wrote comments for each plant in June, July, August and September. Plants and flowers were rated 0-5 using the following scale:

0 = Dead/No flowers

1 = Poor: Plants are very sick or dying, extremely few flowers

2 = Below Average: Plants are unattractive in some form, i.e. – leggy growth habit, chlorotic or low vigor, flowers are few and occurring sporadically

3 = Average: Plant appearance with growth characteristics that would be expected for the time of season; flowers would be few but uniform across the plants

4 = Good: Plants look attractive (foliage, growth habit, etc.); flowers are blooming strong and showy

5 = Excellent: Plants are very healthy and uniform; flowering is impressive

Selection of “Top Performers”

On November 19th, 2021, a conference call was convened with CSU staff and the Perennial Trial Garden Subcommittee. Pictures of entries from the 2019 planting were posted to the Perennial Trial website for review. Data from the growing season was compiled and emailed to each evaluator prior to the conference call for review. After discussion and looking at the pictures taken throughout the season, each plant was voted on by each member of the committee as to whether it should be awarded the designation as a “Top Performer”.

“Top Performers” for 2021 Season

Class of 2019 Grown 3 Summers and 2 Winters

Achillea ‘Firefly Sunshine’ (Achillea x hybrida) from Walters Gardens, Inc. /Proven Winners®

Vibrant yellow flowers provided a lot of color and with a long-lasting bloom. Dark green foliage also made the flower color stand out. It had superior qualities with a more compact growth habit that did not lodge despite overhead watering and had excellent winter survival. It was also noted that it did not spread around the garden which is a definite plus.

Brunnera ALCHEMY™ Silver (Brunnera macrophylla) from Terra Nova Nurseries

This great plant can brighten up a shady area with a constant display of beautiful silver foliage. Plants are vigorous and are covered by a delicate cloud of light blue flowers from about May into June. Leaves are relatively thick and stands up well with strong stems to create a very attractive and uniform growth habit.

Eupatorium Euphoria™ Ruby (Eupatorium purpureum 'FLOREUPRE1'PP31,668) from Darwin Perennials®

Shorter and more compact than the species, this is a nice medium size plant for the modern landscape. This was a unanimous choice for the “Top Performer” award with dependable light ruby/lilac-colored flowers that combines well with dark leaves and stems. It was noted to be an excellent pollinator plant.

Perovskia CrazyBlue (Perovskia atriplicifolia 'CrazyBlue' PP #25,639) from Darwin Perennials®

Plants were noted to have superior flowering and growth habit. The flowers have a long-lasting bloom period and the violet-blue flowers last longer than other Perovskia. Uniform plants had interlacing branching and sturdy stems that kept it from lodging and maintained an attractive appearance all season. It is a mid-sized plant about 3-4 feet in height.

Rosa Sunbeam Veranda® (Rosa x 'Korfloci52' PP23,314) from Star® Roses and Plants

Glossy, dark green foliage made the bright yellow flower color even more stunning. Blooming started in June and lasted well into September. The compact size makes this a great choice for smaller gardens spaces. Plants had excellent winter hardiness.

Rosa Cherry Frost™ (Rosa x 'Overedclimb'PP31,286) from Star® Roses and Plants

Abundant bright red flowers and good disease resistance make this a good climbing rose for Colorado. Clusters of small flowers kept repeating throughout the growing season in flushes for long lasting color. It had excellent winter survival.

Sedum Prima Angelina (Sedum rupestre) from Darwin Perennials®

Great neon yellow foliage makes this an excellent foliage plant in the summer and it also is quite showy in the winter with a nice shade of red. The spreading growth habit is very uniform and a great choice with rock gardens or combined with other Sedums for additional color contrast. Prima Angelina is superior to the straight Angelina with better branching and growth habit while also being less brittle.

Veronica Moody Blues® Mauve Improved (Veronica spicata) from Darwin Perennials®

Impressive vibrant, mauve colored blooms covered the plants at peak and repeated later in the season. Well branched plants were compact and very uniform with 100% winter survival. It has the added bonus of being a good bloomer the first year in the garden.

Selection of “First Year Perennials with Superior Flowering”

On December 17th, 2021, a conference call was convened with CSU staff and the Perennial Trial Garden Subcommittee. Pictures of entries from the 2021 plantings that were labeled ‘First Year Flowering’ and had excellent ratings were posted to the Perennial Trial website for review. Data from the growing season was compiled and emailed to each evaluator prior to the conference call for review. After discussion and looking at the pictures taken throughout the season, each plant was voted on by each member of the committee as to whether it should be awarded the designation as a “First Year Perennial with Superior Flowering”. These are perennials that were planted between May 15th and June 15th of 2021 and have not yet gone through a winter and survival data has not yet been collected.

First Year Perennials with Superior Flowering

Delphinium Delgenius Glitzy from Pacific Plug and Liner

Each plant had multiple spikes of blooms and huge flower size which made an impressive display of color. Plants rebloomed after spent flowers were removed. The entire Delgenius series were strong performers in the garden and “Glitzy” is the newest addition to the series.

Echinacea SunMagic Vintage series from Flamingo Holland / Bull Breeding

The SunMagic Vintage series is known for its compact plant size and uniform growth habit. Plants filled in fast the first year while blooms were noted for having lots of petals and for holding their color for a long time. Although it was noted that it had attractive mottling on the flowers as it faded. SunMagic Vintage Ruby was particularly appealing with a unique fluorescent color.

Kniphofia POCO Citron™ from Terra Nova Nurseries, Inc.

Strong blooming first year started from May all the way into September. Plants were uniform and the sword like foliage created a unique texture for the garden. Blooms also make a good cut flower.

Lavandula Lavenzine Elegance from Pacific Plug and Liner

Plants were relatively taller and bushier than many other lavenders. Flowers were unique with the longer spike and dark color. Plants were relatively low maintenance, uniform and had no pests.

Salvia Dark Matter™ from Danziger

Dark flowers were the inspiration for the name as the plants were covered in intense, dark blue flowers. Blooming starts early and rebloomed all summer. Plants were recognized for good branching and great uniformity. It makes a great pollinator plant.

Entries that Failed to Overwinter

Some plants had extreme winter losses but if at least one plant survived through the winter they were included in the data even if it died out later in the season. Plants listed below are varieties that had a zero percent survival rate for the 2020-2021 winter.

Genus	Cultivar	Company	Year Planted
Carex	Feather Falls™	Pacific Plug and Liner	2019

Class of 2019 Size, Data and Comments for 2021

Genus	Common Name	Company	Color	Height and Width* on 09/27			Year Planted
Achillea	Firefly Sunshine	Walters Gardens, Inc. /Proven Winners®	Yellow	H: 53	W: 34.5	2019	
	Plant/Flower Rating June:	4.3 / 4.7	Comments:	Great yellow color, some seedlings from other varieties			
	Plant/Flower Rating July:	4.0 / 4.2	Comments:	Nice, light yellow flower, no lodging, beautiful, great foliage			
	Plant/Flower Rating Aug:	4.0 / 3.5	Comments:	Past bloom, nice foliage, great yellow color, very vigorous			
# Planted:	6	Plant/Flower Rating Sept:	4.0 / 3.0	Comments:	Done blooming, deadheading		
Survival:	100.0%	Additional Comments:	Vibrant yellow flowers bloomed all season, dark foliage created great constrast, nice compact growth that doesn't spread or self seed, strong stems and did not lodge				
Achillea millefolium	Desert Eve™ Deep Rose	Syngenta	Pink	H: 22	W: 20.5	2019	
	Plant/Flower Rating June:	2.0 / 3.0	Comments:	Nice pink, shorter plants			
	Plant/Flower Rating July:	2.3 / 3.0	Comments:	Not as vigorous, white to rose			
	Plant/Flower Rating Aug:	2.8 / 2.3	Comments:	Chlorotic			
# Planted:	18	Plant/Flower Rating Sept:	3.0 / 2.5	Comments:	Not vigorous for yarrow, chlorotic		
Survival:	55.6%	Additional Comments:	Plants did very well in beginning of season and during peak bloom, bloomed very nicely with good pink color, after finished blooming did not look good, had to be cleaned up and taken almost to the ground, did not fill in nicely				
Achillea millefolium	Desert Eve™ Red	Syngenta	Red	H: 11	W: 25.5	2019	
	Plant/Flower Rating June:	4.0 / 4.0	Comments:	Vibrant red, upright			
	Plant/Flower Rating July:	3.2 / 3.0	Comments:	Some yellowing of foliage, 50% done blooming, plants lodging, flopping, chlorotic, not attractive			
	Plant/Flower Rating Aug:	2.5 / 3.0	Comments:	Chlorotic, not attractive after bloom, low growing			
# Planted:	18	Plant/Flower Rating Sept:	2.7 / 2.5	Comments:	Yellowing not vigorous, chlorotic		
Survival:	100.0%	Additional Comments:	Plants did very well in beginning of season and during peak bloom, bloomed very nicely with good red color, after finished blooming did not look good, had to be cleaned up and taken almost to the ground, did not fill in nicely				
Achillea millefolium	Desert Eve™ Terracotta	Syngenta	Yellow	H: 24	W: 28.5	2019	
	Plant/Flower Rating June:	4.5 / 4.5	Comments:	Nice tan eye and pink outer flower, great vibrant yellow			
	Plant/Flower Rating July:	3.2 / 3.0	Comments:	Almost done blooming, more lodging			
	Plant/Flower Rating Aug:	2.8 / 2.5	Comments:	Lodging, taller plants, out of bloom			
# Planted:	15	Plant/Flower Rating Sept:	3.0 / 2.0	Comments:	Few flowers, not even in habit		
Survival:	100.0%	Additional Comments:	Taller plants, good foliage, nice pink flowers with yellow edges, some lodging later in season, bloomed throughout the season				
Achillea millefolium	Milly Rock Red	Darwin Perennials	Red	H: 19	W: 21	2019	
	Plant/Flower Rating June:	3.5 / 4.7	Comments:	Compact and nice color			
	Plant/Flower Rating July:	2.5 / 2.3	Comments:	Very dwarf habit, red and yellow, short missing plants			
	Plant/Flower Rating Aug:	2.3 / 2.0	Comments:	Uneven growth, flowering almost done			
# Planted:	15	Plant/Flower Rating Sept:	2.3 / 2.0	Comments:	Uneven habit, few secondary flowers		
Survival:	100.0%	Additional Comments:	Nice compact growth habit, bright red flowers, good foliage				

*Height and width measurements in centimeters.

Rating Scale: 5=Excellent, 4=Good, 3=Average, 2=Below Average, 1=Poor, 0=Dead/None. Average ratings based on evaluations by Perennial subcommittee members.

Percent survived is based on plants surviving from initial planting.

Class of 2019 Size, Data and Comments for 2021

Genus	Common Name	Company	Color	Height and Width* on 09/27	Year Planted
Achillea millefolium	Milly Rock Rose	Darwin Perennials	Pink	H: 42 W: 52	2019
	Plant/Flower Rating June:	4.0 / 3.3	Comments:	Taller with bright pink	
	Plant/Flower Rating July:	3.8 / 3.8	Comments:	No lodging, lots of bloom, pink to white, beautiful	
	Plant/Flower Rating Aug:	3.3 / 2.5	Comments:	Holding up well throughout the season, nice rose colored flowers, lots of flowers	
	Plant/Flower Rating Sept:	3.0 / 2.0	Comments:	A few secondary flowers good foliage color	
# Planted:	15				
Survival:	100.0%	Additional Comments: Strong plants, vibrant rose flowers that bloomed all season, strong stems, compact growth habit, performed well all season			
Artemisia abrotanum	Leprechaun	PlantSelect®		H: 99 W: 95	2019
	Plant/Flower Rating June:	3.5 / 0.0	Comments:	Starting to fill out, nice foliage	
	Plant/Flower Rating July:	4.7 / 0.0	Comments:	Very vigorous, beautiful foliage, no flowers	
	Plant/Flower Rating Aug:	3.8 / 4.0	Comments:	Tall, very vigorous, seems like could be too wet, uniform	
	Plant/Flower Rating Sept:	3.7 / 2.0	Comments:	Very vigorous, opens up, feathering, starting to open in the middle, could be too wet	
# Planted:	14				
Survival:	100.0%	Additional Comments: Interesting foliage, strong stems, could tolerate drier conditions, very fragrant			
Brunnera	ALCHEMY™ Pewter	Terra Nova Nurseries	Blue	H: 46 W: 59	2019
	Plant/Flower Rating June:	4.3 / 3.5	Comments:	Very vigorous, almost past bloom, more silver variegation, some purple flowers remain, very nice lilac color	
	Plant/Flower Rating July:	4.5 / 2.0	Comments:	Done blooming, very uniform, great growth habit	
	Plant/Flower Rating Aug:	4.8 / 3.0	Comments:	Looks nice, large leaves, very uniform habit	
	Plant/Flower Rating Sept:	4.7 / 1.0	Comments:	Nice plants, good foliage, looks good, vigorous	
# Planted:	18				
Survival:	100.0%	Additional Comments: Nice foliage, strong plants, thick leaves, not as much silver in the leaf as the previous, blooms early in the season and has many flowers			
Brunnera	ALCHEMY™ Silver	Terra Nova Nurseries	Blue	H: 50 W: 63.5	2019
	Plant/Flower Rating June:	4.0 / 3.3	Comments:	Very vigorous, almost past bloom, great leaf color, some flowers still present	
	Plant/Flower Rating July:	4.0 / 0.0	Comments:	More white in leaf, very uniform, very nice growth habit	
	Plant/Flower Rating Aug:	3.8 / 2.5	Comments:	Perfect, amazing foliage, great deep silver veins, very uniform habit	
	Plant/Flower Rating Sept:	4.0 / 1.0	Comments:	Stunning foliage, some secondary blooms, strong stems	
# Planted:	18				
Survival:	100.0%	Additional Comments: Beautiful silver foliage, blooms early in season and is covered with delicate purple flowers until about June, very vigorous, thick leaves, very strong stems, very attractive and uniform growth habit			
Caryopteris clandonensis	Grand Bleu®	Darwin Perennials	Blue	H: 83 W: 54.5	2019
	Plant/Flower Rating June:	3.3 / 0.0	Comments:	Some did not overwinter, but ones that survived are vigorous	
	Plant/Flower Rating July:	3.8 / 0.0	Comments:	Bush like habit, some plants missing, nice foliage, no flowers	
	Plant/Flower Rating Aug:	3.5 / 2.5	Comments:	Upright form, could be useful, starting to bud	
	Plant/Flower Rating Sept:	4.0 / 4.0	Comments:	Good darker leaf color, bee friendly, tight and compact, nice dark color	
# Planted:	14				
Survival:	71.4%	Additional Comments: Bloomed late in the season, many flowers, some previous death, plants that survived looked nice and had bush like habit			

*Height and width measurements in centimeters.

Rating Scale: 5=Excellent, 4=Good, 3=Average, 2=Below Average, 1=Poor, 0=Dead/None. Average ratings based on evaluations by Perennial subcommittee members.

	Plant/Flower Rating June:	3.3 / 0.0	Comments:	Taller and nice color				
	Plant/Flower Rating July:	3.8 / 2.8	Comments:	Light foliage color, just planted, unique flower colors				
	Plant/Flower Rating Aug:	3.5 / 3.0	Comments:	Going into secondary flowering, nice red to yellow color, nice foliage, plants getting bigger				
	Plant/Flower Rating Sept:	4.0 / 2.3	Comments:	More secondary flowers, red to yellow color, great foliage				
	# Planted: 16							
Survival:	100.0%	Additional Comments:	Newly planted, compact growth, filled in nicely, red flowers					
Achillea ptarmica	Marshmallow	Benary+	White	H:	30	W:	45	2021
	Plant/Flower Rating June:	3.0 / 2.0	Comments:	Small plants				
	Plant/Flower Rating July:	3.0 / 2.7	Comments:	Just planted				
	Plant/Flower Rating Aug:	3.5 / 3.3	Comments:	Still in bloom, lots of nice white flowers, plants growing well				
	Plant/Flower Rating Sept:	4.3 / 2.7	Comments:	Vigorous grower, ground cover				
	# Planted: 18							
Survival:	100.0%	Additional Comments:	Newly planted, grew very quickly, bloomed later in season, nice small double white blooms, performed very well					
Arabis caucasica	Catwalk White	Benary+	White	H:	16	W:	29	2021
	Plant/Flower Rating June:	3.3 / 5.0	Comments:	Small plants, from seed				
	Plant/Flower Rating July:	3.4 / 1.0	Comments:	Just planted, some blooms				
	Plant/Flower Rating Aug:	3.8 / 0.0	Comments:	Nice foliage, nice mounding habit, starting to establish				
	Plant/Flower Rating Sept:	4.0 / 0.0	Comments:	Good foliage and rounded habit, vigorous				
	# Planted: 18							
Survival:	100.0%	Additional Comments:	Newly planted, great mounded habit, few flowers through the season, flowers were creamy white, established very nicely					
Artemisia gmelinii	SunFern™ Arcadia	Darwin Perennials		H:	19	W:	38.5	2021
	Plant/Flower Rating June:	3.5 / 1.0	Comments:	Small plants, no blooms				
	Plant/Flower Rating July:	3.2 / 0.0	Comments:	Newly planted, 1 flower				
	Plant/Flower Rating Aug:	3.5 / 2.0	Comments:	Somewhat uneven growth, plants smaller, color darker later in season				
	Plant/Flower Rating Sept:	3.0 / 2.0	Comments:	More uneven habit, some reddish fall color, nice foliage				
	# Planted: 16							
Survival:	100.0%	Additional Comments:	Newly planted, great name and marketing, great plants, darker foliage color, groundcover habit					

*Height and width measurements in centimeters.

Rating Scale: 5=Excellent, 4=Good, 3=Average, 2=Below Average, 1=Poor, 0=Dead/None. Average ratings based on evaluations by Perennial subcommittee members.

Percent survived is based on plants surviving from initial planting.

Class of 2021 Size, Data and Comments for 2021

Genus	Common Name	Company		Color	Height and Width* on 09/27			Year Planted		
Artemisia gmelinii	SunFern™ Olympia	Darwin Perennials			H:	22	W:	33	2021	
	Plant/Flower Rating June:	2.8	/	0.0	Comments:	Small plants, one single bloom, lower ground cover				
	Plant/Flower Rating July:	3.4	/	0.0	Comments:	Newly planted, ground cover, vigorous				
	Plant/Flower Rating Aug:	3.5	/	5.0	Comments:	Great growth for first year, low growing, dark foliage, could tolerate drier conditions				
	# Planted: 16	Plant/Flower Rating Sept:	4.0	/	3.0	Comments:	Dwarf and darker green foliage, very nice plant, strong plants, covering most of the ground			
Survival: 100.0%	Additional Comments:	Newly planted, great name and marketing, great plants, good groundcover, good foliage								
Brunnera	Alexandria	Terra Nova Nurseries			H:	42	W:	42.5	2021	
	Plant/Flower Rating June:	3.7	/	0.0	Comments:	Just planted, small plants, still a few flowers left on it, nice lilac color				
	Plant/Flower Rating July:	4.5	/	2.4	Comments:	Just planted, growing well, large leaves				
	Plant/Flower Rating Aug:	3.8	/	2.8	Comments:	Spectacular, amazing foliage, great leaves, some secondary blooming, very uniform				
	# Planted: 18	Plant/Flower Rating Sept:	4.0	/	2.0	Comments:	Great foliage, few flowers			
Survival: 100.0%	Additional Comments:	Newly planted, some secondary blooms, large silver leaves, nice small lilac flowers, great first year of growth								
Buddleia davidii	Chrysalis™ Blue	Darwin Perennials			Purple	H:	54	W:	55	2021
	Plant/Flower Rating June:	4.0	/	4.5	Comments:	Not blue, more violet				
	Plant/Flower Rating July:	3.8	/	2.6	Comments:	Dwarf habit, just planted				
	Plant/Flower Rating Aug:	4.3	/	4.0	Comments:	Not really blue, good habit, lots of flowers				
	# Planted: 18	Plant/Flower Rating Sept:	4.7	/	3.3	Comments:	Good habit and vigorous, silver green foliage, very compact			
Survival: 100.0%	Additional Comments:	Newly planted, strong stems, not really blue more pink, some blooms under foliage								
Buddleia davidii	Chrysalis™ Cranberry	Darwin Perennials			Magenta	H:	81	W:	84	2021
	Plant/Flower Rating June:	4.3	/	2.0	Comments:	Some reverting colors, not uniform, tallest one				
	Plant/Flower Rating July:	4.0	/	2.8	Comments:	Taller growth habit, just planted, only some are cranberry colored				
	Plant/Flower Rating Aug:	4.0	/	3.5	Comments:	So strange darker flowers in interior				
	# Planted: 18	Plant/Flower Rating Sept:	4.3	/	3.3	Comments:	Vigorous growing			
Survival: 100.0%	Additional Comments:	Newly planted, unstable genetics with flower color, non uniform color and habit, great pollinator								
Buddleia davidii	Chrysalis™ Pink	Darwin Perennials			Dark Pink	H:	60	W:	55	2021
